

Vaccination Inoculation Combination Drug

The poisonous chemicals in the Vaccination/inoculation combination drugs can permanently harm the individual. The drugs damage the immunity, age the brain and cause nerve damage diseases such as Autism. The use of the vaccination drug is based upon superstitions, theories and is fallacy laden. It is believed that making the body sick with a drug will make the body healthy. If people believed that their vaccination protects them then why should they be afraid of an unvaccinated person and make that person take a mandatory vaccination.

People that are unvaccinated are discriminated (employment, schools) against and are believed to be able to spread a contagious disease. Other people with contagious disease such as HIV, gonorrhea, Herpes, TB, syphilis, hepatitis, Poliovirus and Flu are allowed to go freely about in society.

People that are recently vaccinated are given The disease and spread the disease (shed). Mandatory vaccination drug use means a privately owned drug business is allowed to force you to use their product. If you do not use it, you can be punished, put in quarantine, lose your job or cannot be allowed to travel or not allowed to attend school. If an adult refuse to vaccinate their child, they can be charged with child abuse and be given a criminal record.

The Vaccinations Theory was developed without knowledge of the immune system. The immune system is a set of physiological reactions to a germ (virus, bacteria, fungus, yeast, protozoa).

Virus is medically defined as not alive and alive; it is a particle of a dead cell. It is not alive and therefore can not be killed with antibiotics. An antibody against one virus might no work against another virus. A vaccination injection in the blood only protects the blood tissue and not the nerve, bone, muscle or humoral tissue(lymph tissue fluid).

Humoral immunity is imprecise while cellular immunity is precise for tissue such as blood tissue. The US Supreme Court and Congress declared that vaccines to be "Unavoidably Unsafe" which means they harm the body.

No company should have government approval to force you to use their products.

Vaccination/Inoculation Combination Drugs

(Chemical filth)

Contains substances that cause diseases and death such as:

**Germs, Live viruses, Bacteria, Animal RNA and DNA
Monkey Kidneys, Chick Embryo, and Foreign
proteins**

**Calf Serum, Undetected Animal viruses, Carcinogens &
Toxic Substances**

Aluminum (aneuro-toxin)

Thimerosal (a Mercury Derivative)

Formaldehyde (a major component of embalming fluid)
