

# Comprehensive List Of Companies That Use Aborted Fetal Cells As Flavour

KILLUMINATI SOLDIERS · THURSDAY, SEPTEMBER 8, 2016

## **Comprehensive List Of Companies That Use Aborted Fetal Cells As Flavour**

**Senomyx** is an American biotechnology company working toward developing additives to amplify certain flavors and smells in foods. The company claims to have essentially "reverse engineered" the receptors in humans that react for taste and aroma, and that they are capitalizing on these discoveries to produce chemicals that will make food taste better. Senomyx develops patented flavor enhancers by using "proprietary taste receptor-based assay systems." These receptors have been previously expressed in HEK293 cells. HEK stands for human embryonic kidney cells. These cells, originally came from a healthy, electively aborted human fetus in the early 1970s. Using information from the human genome sequence, Senomyx has identified hundreds of taste receptors and currently owns 113 patents on their discoveries. Senomyx collaborates with seven of the world's largest food companies to further their research and to fund development of their technology.

## **Biotech company using aborted fetal cell lines to test its flavor enhancers**

(Largo, FL) Children of God for Life is calling on the public to boycott products of major food companies that are partnering with Senomyx, a biotech company that produces artificial flavor enhancers, unless the company stops using aborted fetal cell lines to test their products.

**In 2010, the pro-life organization wrote to Senomyx CEO Kent Snyder, pointing out that moral options for testing their food additives could and should be used.** But when Senomyx ignored their letter, they wrote to the companies Senomyx listed on their website as “collaborators” warning them of public backlash and threatened boycott. Food giants Pepsico, Kraft Foods, Campbell Soup, Solae and Nestlé are the primary targets of the boycott, though Senomyx boasts other international partners on their website.

Senomyx website states that **“The company’s key flavor programs focus on the discovery and development of savory, sweet and salt flavor ingredients that are intended to allow for the reduction of MSG, sugar and salt in food and beverage products....Using isolated human taste receptors, we created proprietary taste receptor-based assay systems that provide a biochemical or electronic readout when a flavor ingredient interacts with the receptor.”**

Senomyx notes their collaborators provide them research and development funding plus royalties on sales of products using their flavor ingredients.

“What they do not tell the public is that they are using HEK 293 – human embryonic kidney cells taken from an electively aborted baby to produce those receptors”, stated Debi Vinnedge, Executive Director for Children of God for Life, a pro-life watch dog group that has been monitoring the use of aborted fetal material in medical products and cosmetics for years.

“They could have easily chosen COS (monkey) cells, Chinese Hamster Ovary cells, insect cells or other morally obtained human cells expressing the G protein for taste receptors”, Vinnedge added. In writing to their collaborators, it took three letters before Nestlé finally admitted the truth about their relationship with Senomyx, noting the cell line was “well established in scientific research”. After hearing Ms Vinnedge speak publicly on the problem, angry consumers began writing the companies. Both Pepsico and Campbell Soup immediately responded. Shockingly, Pepsico wrote: “We hope you are reassured to learn that our collaboration with Senomyx is strictly limited to creating lower-calorie, great-tasting beverages for consumers. This will help us achieve our commitment to reduce added sugar per serving by 25% in key brands in key markets over the next decade and ultimately help people live healthier lives.” Campbell Soup was more concerned in their response: “Every effort is made to use the finest ingredients and develop the greatest selection of products, all at a great value. With this in mind, it must

be said that the trust we have cultivated and developed over the years with our consumers is not worth compromising to cut costs or increase profit margins.”

While Campbell did not state they would change their methods, still their response, gave Vinnedge hope. “If enough people voice their outrage and intent to boycott these consumer products, it can be highly effective in convincing Senomyx to change their methods”, she noted.

**Click here to read the response letters from Pepsico, Campbell Soup and Nestlé letters (Letter 1, 2, 3):**

Letter 1 - <http://www.cogforlife.org/nestle10001.pdf>

Letter 2 - <http://www.cogforlife.org/nestle2.pdf>

Letter 3 - <http://www.cogforlife.org/nestle3.pdf>

**Need proof of Senomyx use of aborted fetal cell lines? Following is the link to the on-line article for their patent on sweet receptors (they filed several separate patents for each of the different**

taste receptors):

<http://www.ncbi.nlm.nih.gov/pmc/articles/PMC123709/>

**As it is lengthy and technical, I recommend you simply do a search in the document for HEK-293. HEK CELL** (Human Embryonic Kidney 293 cells), also often referred to as HEK 293, 293 cells, or less precisely as HEK cells are a specific cell line originally derived from human embryonic kidney cells grown in tissue culture. HEK 293 cells are very easy to grow and transfect very readily and have been widely-used in cell biology research for many years. They are also used by the biotechnology industry to produce therapeutic proteins and viruses for gene therapy.

**Below is a list of products that contain HEK cells. HEK cell**

**Products:** <http://www.cogforlife.org/fetalproductsall.pdf>

**Pepsi Beverages:**

- All Pepsi soft drinks
- Sierra Mist soft drinks
- Mountain Dew soft drinks
- Mug root beer and other soft drinks
- No Fear beverages
- Ocean Spray beverages
- Seattle's Best Coffee
- Tazo beverages
- AMP Energy beverages

- Aquafina water
- Aquafina flavored beverages
- DoubleShot energy beverages
- Frappuccino beverages
- Lipton tea and other beverages
- Propel beverages
- SoBe beverages
- Gatorade beverages
- Fiesta Miranda beverages
- Tropicana juices and beverages

**Other Senomyx Partner Products Nestles Products:**

- All coffee creamers
- Maggi Brand instant soups, bouillon cubes, ketchups, sauces, seasoning, instant noodles

**Kraft – Cadbury Adams LLC Products:**

**Gum**

- Black Jack chewing gum
- Bubbaloo bubble gum
- Bubblicious bubble gum
- Chiclets
- Clorets
- Dentyne
- Freshen Up Gum
- Sour Cherry Gum (Limited)
- Sour Apple Gum (Limited)

- Stride
- Trident

### **Cadbury Adams LLC Candies**

- Sour Cherry Blasters
- Fruit Mania
- Bassett's Liquorice All sorts
- Maynards Wine Gum
- Swedish Fish
- Swedish Berries
- Juicy Squirts
- Original Gummies
- Fuzzy Peach
- Sour Chillers
- Sour Patch Kids
- Mini Fruit Gums

### **Other Cadbury Adams LLC Products:**

- Certs breath mints
- Halls Cough Drops

### **Not part of Senomyx – Neocutis Products:**

This company produces anti wrinkle creams that contain cells from a 14 week gestation aborted male baby. Following is the list of the creams, but we recommend a full boycott of all Neocutis Products.

- Bio-Gel Prevedem Journee
- Bio-Serum Lumiere
- Bio Restorative Skin Cream

## **Vaccines Containing HEK Cells And the Manufacturers:**

MMR II (Merck)

ProQuad (MMR + Chickenpox – Merck)

Varivax (Chickenpox – Merck)

Pentacel (Polio + DTaP + HiB – Sanofi Pasteur)

Vaqta (Hepatitis-A – Merck)

Havrix (Hepatitis-A – Glaxo SmithKline)

Twinrix (Hepatitis-A and B combo – Glaxo)

Zostavax (Shingles – Merck)Imovax (Rabies – Sanofi Pasteur)

## **Other medicines:**

Pulmozyme (Cystic Fibrosis – Genetech)

Enbrel (Rheumatoid Arthritis – Amgen)

**Note:** Moral options exist for Rabies, Polio,Rheumatoid Arthritis.

Separate moral optionscurrently not available for Measles and

Mumps.

## **Pro-lifers drop boycott after Pepsi disavows use of aborted fetal-cells:**

<http://www.washingtontimes.com/news/2012/apr/30/pro-lifers-drop-pepsi-boycott/>

# List Of Companies Using Fetal Cells From Aborted Babies To Flavour Products

)

**The Real News**

by *admin* - March 19, 2017

In 2010, the pro-life organization wrote to the CEO of Senomyx, Jewish Zionist Kent Snyder, indicating the many ethical and moral choices that can and should be used to test their food additives.

However, Senomyx and the companies listed on its website as “partners” decided to ignore the letter. The giants of the food industry as Pepsico, Kraft Foods, Campbell Soup, Solae and Nestle are the main targets of the boycott, although Senomyx account other international partners on their website.

Senomyx’s website says that “the key programs of flavor company focusing on the discovery and development of savory ingredients, candy and other additives intended to reduce the MSG, sugar and salt in food and beverage products (...) “, proclaiming that” (...) using the isolated human taste receptors, we created proprietary test systems based on taste receptors that provide a biochemical or electronic readout when a flavor ingredient interacts with the receptor. ”

Senomyx says its partners will provide funding for research and development, plus on sales of products using their flavor ingredients.

“What is hidden from the public who are using HEK 293 – human embryonic kidney cells taken from an electively aborted baby to produce these receptors,” said Debi Vinnedge, Executive Director of Children of God for Life, a pro-life organization and ethics which monitors the use and amount of aborted fetal material in medical and cosmetic products (per year).

“They could use monkey cells (CON) cells, Chinese hamster ovary cells, insect cells or other human taste receptor, morally obtained, expressing the G protein,” said Vinnedge.

After several requests for information Nestlé finally admitted his relationship with Senomyx, indicating that the cell line was “well established in the scientific research”.

After listening to Ms. Vinnedge in April 2012, exposing the reality of the problem, many consumers-angry citizens began to express their condemnation of such immorality through letters to companies. Campbell Soup and PepsiCo responded immediately.

Pepsi was one of the companies with Monsanto contributed money in the campaign against GM labeling.

Surprisingly, Pepsico wrote: “We expect to feel safe knowing that our collaboration with Senomyx is strictly limited to the creation of drinks with lower calorie and great taste for consumers. This cooperation will help us achieve our commitment to reduce sugar by 25% in key brands and the main markets of the next decade, eventually, we help people live healthier lives. “Read the article: – Coca Cola and Pepsi cause cancer –

The Campbell Soup corporation was a little concerned about the answer: “Every effort will be made to use the best ingredients and

develop the largest selection of products, providing a great value. With this in mind, I must say that it is not worth compromising the trust we have grown and developed over the years with our customers to reduce costs or increase profit margins. ”

Although Campbell said not change their methods, Vinnedge felt hope.

“If enough people express their outrage and their intention to boycott these consumer products, Senomyx it could be forced to change their methods,” he said.

Fetal Cell Research Used In Food Production

---

***There is NOTHING NORMAL about the Weaponizing of food, beverages and other daily products human beings ingest, internally or topically, that would***

*require this material to find a place in civilized daily practices or society!!*

By

Susan Price, Gold Star Mother & Analyst

-

February 8, 2018

“Known as “HEK-293,” the aborted human fetal cell line used by a California Biotechnology Company called Senomyx which manipulates and evaluates how the human palate will react to synthetic flavors used in the production of processed foods.

Senomyx works with seven of the world’s largest food companies to further their research while funding the development of their technology.

During the past half century, Americans have become experimented on at every level of existence. We have been introduced to many foreign matters

in our air, water, food, beverages, ingesting toxins and hidden viruses effecting our wellness.

Biotechnology companies have ghoulishly weaponized our food & beverages transforming them into Frankenstein Foods, created in labs with taboo ingredients, raising questions of moral, ethical, spiritual and health related debates.

Mankind is also witnessing emerging and connecting patterns in society, showing clues to those who are awake enough to see there is a wicked hidden global agenda, these include the rise and push for abortions, the increase in human trafficking, body harvesting, child abductions, mass illegal immigration issues fueling the root cause for the evil plot all networked into the rituals and cannibalistic acts plaguing humanity.

Many speak out against these egregious acts echoing truths and facts are about to unfold this year that have been handcuffed for decades through an obtuse geopolitical order.

Recognizing there was and is a brazenly nefarious plot against all good people of this earth belonging to an origin once coveted, and owning a deviated belief system, one without boundaries as it's shadows enucerp the spirits of light filled vessels, initiating and ambushing it's prey openly through the guise of sustenance?

The 1% of the worlds population owns and operates the 99%. Through the commerce industry and businesses built on the supply and demand and repeat business system, the number one focus and mission is always about the money.

Manufacturers recognize the power they hold over their consumers when hooked on a particular product, in this case the biotechnology company Senomyx created sweeteners or “addictive” additives through the unholy act of inhumane and unforgiving practices and substances. Are these corporations involved in partnership of this sadistic practice so morally bankrupt that they want the entire population on their level of thinking and unfeeling?

To date, much controversy has arisen via conscious consumers regarding the most vile acts committed against consumers, and the bi-products of aborted fetuses, violating all we hold sacred.

Is the consumption of these food and beverage products the origins of many mysterious disorders and diseases presenting themselves to us in the 21st century, insuring side effects and massive health risks to our immune mutations, dna altering, viruses, and other related? Note Big Pharma is in a war as we speak against the practices of holistic doctors and therapists, all unraveling in D.C., as the nefarious efforts of shadow government trying to lasso the common man down from practicing alternative health care measures. We have witnessed the untimely deaths of many alternative Dr’s and Practitioners regarding these matters the past few years.

To date, there are no recent laws that govern against these morally debased acts.

The goal it would seem would be to progress us towards transhumanism, where our human bodies would not require proper nutrition and would become vulnerable to nano fibers and nano particles containing the (AI)

artificial intelligence, turning on and off the receptors in our systems and the complexities of our mindsets, playing GOD with our genetic code.

Senomyx is one of the most powerful American biotechnology companies in question, Headquartered in California, Senomyx website states that “The company’s key flavor programs focus on the discovery and development of savory, sweet and salt flavor ingredients that are intended to allow for the reduction of MSG, sugar and salt in food and beverage products....Using isolated human taste receptors, we created proprietary taste receptor-based assay systems that provide a biochemical or electronic readout when a flavor ingredient interacts with the receptor.”

Senomyx notes their collaborators provide them research and development funding plus royalties on sales of products using their flavor ingredients.

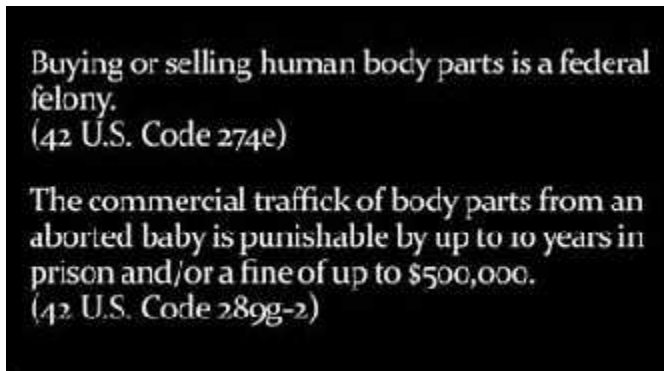

“What they do not tell the public is that they are using HEK 293 – human embryonic kidney cells taken from an electively aborted baby to produce those receptors”, stated Debi Vinnedge, Executive Director for Children of God for Life, a pro-life watch dog group that has been monitoring the use of aborted fetal material in medical products and cosmetics for years.

Using information from the human genome sequence, Senomyx has identified hundreds of taste receptors and currently owns 113 patents on their discoveries. This company collaborates with seven of the world’s largest food companies to further their research and to fund development of their technology.”

As consumers, we purchase many different food products at the grocery store from companies such as Kraft, PepsiCo, Nestle and others who have through the years partnered with Senomyx, we are currently ingesting genetically engineered poisons and chemical additives via the the cannibalistic and flavoring agents manufactured using the tissues of aborted human beings into our diets and without conscious awareness until now.

## **Fetal cell research used in food production**

How do we counter this? We must take responsibility for our own health and wellness so this leaves us to researching the products we tend to purchase on a weekly basis and investigate their contents.

We can also consider growing some of our own food and eating more organic, and again, we must research because these fetus bi-products are found in most of our regular food and beverages, snacks, cereals, candies, baby food, even bottled water, medications, vaccinations, skin care and make up and more.

According to an article published January 29, 2016 by Julie Wilson at "NewsTarget"

"Nearly four years have passed since the Obama administration gave

PepsiCo approval to continue its use of aborted human fetal tissue in flavor-enhancing research, despite opposition from its shareholders.

The controversial practice came under fire after the Pro-Life group Children of God for Life exposed the food giant's partnership with Senomyx, a biotech firm that conducts research using aborted fetal cells to develop artificial flavors incorporated into a number of products sold by Kraft Foods, Nestlé and other large food companies.

Also adding: "President Obama's Security and Exchange Commission agreed, ruling in the food giant's favor stating that its contract with Senomyx using aborted fetal cells for product research is simply "ordinary business operations."

While the former President Barack Obama may believe this cannibalistic practice is "just doing business as normal", let me remind him and others alike, you don't speak for the majority of the world's population, most of us possess a moral compass, there is NOTHING NORMAL about the Weaponizing of food, beverages and other daily products human beings ingest, internally or topically, that would require this material to find a place in civilized daily practices or society.

**Currently, there are no current laws protecting consumers on a global scale against those corporate business moguls who weaponize these products against us!**

## **Need proof of Senomyx use of aborted fetal cell lines?**

Following is the link to the on-line article for their patent on sweet receptors (they filed several separate patents for each of the different taste receptors): <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC123709/>

HEK CELL (Human Embryonic Kidney 293 cells), also often referred to as HEK 293, 293 cells, or less precisely as HEK cells are a specific cell line originally derived from human embryonic kidney cells grown in tissue culture. HEK 293 cells are very easy to grow and transfect very readily and have been widely-used in cell biology research for many years. They are also used by the biotechnology industry to produce therapeutic proteins and viruses for gene therapy.

**Vaccines Containing HEK Cells And the Manufacturers:**

**MMR II (Merck)**

**ProQuad (MMR + Chickenpox – Merck)**

**Varivax (Chickenpox – Merck)**

**Pentacel (Polio + DTaP + HiB – Sanofi Pasteur)**

Other medicines:

Pulmozyme (Cystic Fibrosis – Genetech)

Enbrel (Rheumatoid Arthritis – Amgen)

Note: Moral options exist for Rabies, Polio, Rheumatoid Arthritis. Separate moral options currently not available for Measles and Mumps.

See the complete US/CANADA list of vaccines and medicines and any moral options at: <http://www.cogforlife.org/vaccineListOrigFormat.pdf>

According to a recent article by 4-traders, January 18, 2018, included in sources below, the company's narrative boasts of the novel flavor ingredients and natural high intensity sweeteners that allow food and beverage companies to create better-for-you-products.

**About Senomyx, Inc.** – Senomyx discovers novel flavor ingredients and natural high intensity sweeteners that allow food and beverage companies to create better-for-you products. Under its direct sales program, Senomyx sells its *Complimyx*<sup>®</sup> brand flavor ingredients, *Sweetmyx*<sup>®</sup>, *Savorymyx*<sup>®</sup>, and *Bittermyx*<sup>®</sup>, to flavor companies for use in a wide variety of foods and beverages. In addition, Senomyx has partnerships with leading global food, beverage, and ingredient supply companies, which are currently marketing products that contain Senomyx's flavor ingredients. For more information, please visit [www.senomyx.com](http://www.senomyx.com)."
